

September 11, 2023

Dear Community Partners,

I am happy to share that Partners for Healthy Kids can resume our immunization clinics. Our team was faced with the challenges of maintaining appropriate vaccine temperatures on the mobile unit. This was an urgent matter that needed to be addressed to ensure that the vaccines our patients receive offer effective protection against disease. We will resume clinics the week of September 18th with a modified schedule for the remainder of the month. Please see the calendar attached for clinic dates and locations. We look forward to returning at full capacity in October!

Sincerely,

Hayley Searight

Partners for Healthy Kids, Program Supervisor
